

The Benefits of Assistive Technology in the Classroom

**IN TODAY'S DIVERSE
AND INCLUSIVE
EDUCATIONAL
LANDSCAPE, IT IS
CRUCIAL
TO PROVIDE ALL
STUDENTS WITH THE
TOOLS AND RESOURCES
THEY NEED TO SUCCEED**

Assistive technology (AT)

Assistive technology has emerged as a game-changer in the classroom, offering a myriad of benefits for students with special needs. This e-book delves into the numerous ways in which assistive technology can be harnessed in schools to support these students, from enhancing engagement to improving learning outcomes and fostering independence.

Why embrace AT?

The benefits of AT in the classroom are undeniable, as it enhances engagement, improves learning outcomes, fosters independence, and prepares students for a successful future. Embracing assistive technology is not just a matter of accessibility; it's a commitment to ensuring that every student has the opportunity to thrive in the modern educational landscape.

Benefits of AT

Personalised Learning

Students with special needs have unique requirements, and AT can be tailored to address those specific needs.

Inclusivity

Using assistive technology in the classroom fosters a culture of inclusivity, where all students' abilities and challenges are acknowledged.

Real-time Feedback

AT can provide instant feedback to both students and teachers. For instance, software that monitors a student's reading ability.

Lili for Life

At Lili, we follow an altruistic and authentic philosophy. The team is focused on developing innovative solutions to help people with dyslexia.

Lili Lamp Plus

Our Vision

Dyslexia is not a deficit, but rather a way in which vision functions and is interpreted by the brain. At Lili's, we emphasise that dyslexia is, above all, a source of resilience and strength!

Our Mission

To provide innovative technological aids aimed at facilitating easier and more efficient reading for individuals with dyslexia, thereby assisting them in realising their complete potential

The discovery

Two physicists from Rennes, Albert Le Floch and Guy Ropars, received the Raymonde Destreicher prize awarded by the French National Academy of Medicine in 2020, three years after "their work on the demonstration of the right-left asymmetry of Maxwell's centroids of the foveas in adults with and without dyslexia.

Key Insights

10% of the world's population is dyslexic according to the World Health Organisation.

83%

of users experienced a real difference in perception and improved reading.

Made in France

Testimonial

With the Lili lamp the letters are bigger. I can read better, I can read the instructions better. And in the evening I am less tired.

Lucy, 9 years old, Rennes

Logickeyboard

Logickeyboard develops accessible keyboard solutions designed to support learners who benefit from clearer visual guidance and improved confidence when using technology.

Dyslexie Keyboards

Our Commitment

With over 30 years of experience creating specialist keyboards for professional and educational environments, Logickeyboard combines intuitive design with practical accessibility features to help remove barriers and make digital learning more inclusive.

Their dyslexic keyboards use clear, high-contrast lettering and colour-coded layouts to support confidence, independence and easier navigation for learners in the classroom.

Dyslexie Font

Recognising the challenges some learners face with standard keyboards, Logickeyboard incorporated the Dyslexie font into its specialist keyboard range. Created by Christian Boer, the font uses distinctive letter shapes and spacing to make characters easier to recognise and navigate.

Combined with high-contrast labels and accessible design, Logickeyboard keyboards help support confidence and independence when using technology.

Key Benefits

- Large, easy-to-read key labels
- High-contrast and colour-coded design
- Supports learners with dyslexia and visual processing difficulties
- Encourages independent use of technology
- Compatible with classroom computers and devices

Testimonial

Feedback has been overwhelmingly positive, with users commenting that the soft pastel colours help the letters stand out more clearly while reducing visual strain. The keyboard's size, layout, and tactile feel have also been praised for making typing more comfortable, accessible, and enjoyable.

Theresa Grimwood, SpLD Specialist Teacher/Assessor Cowplain School

Nuance Hearing

We offer accessible digital instruments, learning resources, workshops and CPD removing the complexity and putting back the creativity in music technology.

Voice Selector Study

Our Beginnings

The 'cocktail party problem' – or the problem of picking out speech in noisy social situations – has remained stubbornly unaddressed for years. So how do you solve it?

In 2015 two brothers, Yehuda and Zohar Zisapel – both tech pioneers since the 1970s – decided to find the answer. Seeking a technological solution to the challenge of understanding conversation in a packed room.

In the years that followed, we've made quantum leaps in acoustic beamforming, developing an algorithm that leads the world in directional hearing.

Our Future

We make it our mission to provide meaningful, personal empowerment through technology.

Noise and attention issues have a damaging effect on communication for millions of people.

Thanks to our truly breakthrough technology, we are able to make a real impact. Improving the quality of life for a diverse group of people.

Key Insights

Minimising noise, maximising focus. Naturally filtering the teacher's voice from background noise takes effort and concentration. By doing that work for you, Voice Selector Study makes it easier to listen. So you can concentrate better, learn more, and achieve the results you want..

The relief Voice Selector Study provides is immediate, with minimal setup required. Easier concentration and better results have never been closer.

Testimonial

I have tried the Voice Selector Study with a number of ADHD clients who have found it very helpful. One boy has sensitivity to noise, in particular rustling paper, and the device just cuts it out.

Katie Trowse, Neurodiversity Mentor & Tutor

SUMMARY

In conclusion, assistive technology is a powerful tool that promotes diversity, inclusion, and the personalised learning of students with special needs. It not only enhances engagement and learning outcomes but also fosters independence, self-advocacy, and a sense of belonging in inclusive classrooms. By incorporating AT into education, we're empowering all students to reach their full potential and preparing them for a more inclusive and accessible future.
